SKILLS

- Python (including libraries such as Matplotlib, NumPy, Pandas)
- HTML/CSS
- JavaScript (HTML DOM only)
- C++
- Java

LANGUAGES

- English (Fluent)
- French (Limited)
- Kannada (Intermediate)

EDUCATION

Elementary/Middle School Diploma
Dr. Roberta Bondar Public School
(Vaughan, Ontario)
April 2014 - June 2022

High School Diploma
Stephen Lewis S.S.
(Vaughan, Ontario)
Graduating June 2026

SUMMARY

A motivated, well-spoken, and persistent student who has completed over 350 problems on DMOJ, looking to develop existing programming skills and learn new skills in machine learning and apply them in real-world situations.

PROJECTS

Modern Mastermind Game

- Built a recreation of the original Mastermind board game with a few different touches
- Utilized the Java language and its various libraries to handle exceptions and allow for ease-of-use from a user perspective

Scientific Calculator

- Built a sophisticated calculator application using Python with a variation of complicated mathematical operations
- Utilized Tkinter to build a clean GUI for the calculator application
- Embedded the math library to improve efficiency

Data Structures and Algorithms Handbook

- Created a series of formal presentation-style slideshows with a fellow team member to teach students the fundamentals of data structures and algorithms
- Collaborated with the United States of America Computing Olympiad (USACO) in order to further enhance quality
- Incorporated Python code in order to demonstrate various concepts covered

COVID-19 Data Analysis

- Employed a COVID-19 worldwide dataset from Kaggle in order to analyze on Google Colab
- Used the Python libraries NumPy, Pandas, and Matplotlib in order to improve quality
- Determined information about the dataset, such as the country with the highest COVID-19 death rate

EXPERIENCE

CS Club Project Coordinator, Stephen Lewis S.S., Vaughan, Ontario

- Educated a group of more than 15 about different aspects of programming/data structures and algorithms
- Enhanced students' understanding of Python
- Created homework alongside fellow executive members in order to test member retention.
- Provided assistance with preparation for the Waterloo CCC (Canadian Computing Competition)

Web Editor, Havyaka Association of Americas, Remote

- Gathered various submissions related to the performing arts, finance, recipes, among other categories
- Worked to edit and publish submissions on the HAA Creative Minds website
- Came up with some ideas for new categories to increase community engagement
